Dear [Synopsys Talent Acquisition team]:

I am excited about applying for the Synopsys Intern position. I am a second-year engineering student at VIT AP University. My degree emphasis is in electronic and communication engineering with a specialization in VLSI. Synopsys is a big company in the semiconductor industry, and if I worked for Synopsys, it would be an opportunity of a lifetime for me to further develop my knowledge and gain valuable industry experience.

Last, but not least, I believe that my personality makes me well suited for the internship at Synopsys. I try to look at various situations from a holistic perspective, and I can easily take initiative. Additionally, I have always had effective use for my prominent level of creativity.

Thank you for taking the time to look over my resume in order to consider me for your internship. I would appreciate the chance to meet with you and go through the specifics of my schooling, prior internship, and other relevant experiences to your position and firm.

[Yours sincerely],

Harshith Pothuri
